SUMMARY

I am a B. Tech Information Technology student. A creative thinker, adept in software development. Seeking to use my advanced communication skills to effectively serve your company in an Internship position. Dedicated and committed to becoming a dependable and valuable team member. I bring forth high quality organizational skills and a self-motivated drive to achieve excellence.

EDUCATION

Manipal University Jaipur Sept. 2021 to Current
Bachelor of Technology in Information Technology 2025
Pursuing for B.Tech in Information Technology at Manipal University Jaipur, Jaipur, Rajasthan , gaining experience in various fields and enhancing my skills

Hariyana Vidya Mandir School 2019 to 2021
Higher Secondary 2021
Scored 88% in CBSE board exam

Mary Immaculate School 2007 to 2019
High School 2019
Scored 92.3% in ICSE Board Exam

PROJECTS

Hospital Management Frontend Website
User-friendly hospital management frontend website offering intuitive navigation, appointment scheduling, doctors availability, and seamless access to medical services. Enhance healthcare experiences with a streamlined interface and efficient functionality. Coding languages used are HTML, CSS & JS.

To-do List Frontend Web App
Simplify your life with our intuitive to-do list frontend web app. Organize tasks, set priorities, and track progress seamlessly. Stay productive and focused with a user-friendly interface that helps you stay on top of your daily responsibilities. Coding languages used are HTML, CSS & JS.

HR Dashboard
I used Power BI to visualize a set of data to make the headquarters understand how many left the company and stayed and also what's the average salary count, average age group of people working in the company and many more.

News Classification using NLP Oct. 2022 to Nov. 2022
By using Natural Language Processing (NLP), text classifiers can automatically analyze text and then assign a set of pre-defined tags or categories based on its content.

Digital Classification Using CNN Oct. 2022 to Nov. 2022
CNN object classification model takes, processes and classifies an input image, in our case digits, under a certain category. 0 to 9. The task is to allocate a given image of a handwritten digit to one of 10 groups representing values between 0 and 9.

SKILLS

FRONTEND DEVELOPMENT:: HTML, CSS, JavaScript
BACKEND DEVELOPMENT: JAVA, SQL
CODING LANGUAGES: JAVA, C Language, Python
